Web Researcher

Description

We are looking to hire Web Researchers to work on various company projects. A web/data/internet researcher is part of research team that generates specific data needed for any project in a competitive, flexible and timely manner.

Responsibilities

- Carry out thorough research on Industries, Companies, Products, People, etc. based on requirement through the internet and online databases.
- Understand the required information and document the data.
- Identify search keywords and use them to research or harvest maximum information.
- Analyze and classify the information collected and put it in the desired output formats.
- Search and identify relevant websites as sources of information.
- Incorporate the relevant information in database in required format.

Qualifications

- Must be educated to degree level with a good command of English (writing, reading).
- Must have a very good command of Microsoft Office tools (Word & Excel).
- Must have the ability to search on the internet and online applications using appropriate search strings.
- Must have a basic knowledge of social media platforms such as LinkedIn and Facebook.
- Must be able to work Monday to Friday between 1 pm – 10 pm and other shifts if required.

Please follow the [APPLY NOW](#) button on the right or send your up-to-date CV and cover letter at hr@bposol.com.
